

ASSESSMENT GUIDE

Unit Code: ITEC630 IT Masters Project Part A (Project Management), Semester 1, 2026

Assessment 2 – Literature Review Report

Assessment Artefact: Assessor generated summary as per rubric

Weighting [40%]

Why this assessment?

- To test students' understanding of topics relevant to their project and their ability to apply their literature review and critical thinking skills in conducting and reporting literature review.

What are the types of employability skills that I will acquire upon completion of this assessment?

Skill Type	
Developed critical and analytical thinking	☒
Developed ability to solve complex problems	☐
Developed ability to work effectively with others	☒
Developed confidence to learn independently	☒
Developed written communication skills	☒
Developed spoken communication skills	☐
Developed knowledge in the field study	☒
Developed work-related knowledge and skills	☐

Assessment Overview:

Purpose, as written in the EUO

Due date:	5pm, 08 May, 2026
Weighting:	40%
Length and/or format:	Maximum 4000 words
Learning outcomes assessed	LO1, LO2, LO3
Graduate attributes assessed	GA2, GA4, GA5, GA7
How to submit:	LEO
Return of assignment:	Feedback will be provided through Turnitin using rubrics after two weeks
Assessment criteria:	Rubric: see end of document

Context

Literature review is one of the most important steps in a research process. Before commencing a research project, it is critical to understand what is already known about a particular research area, the work that has already been done, and the knowledge and ideas that have been already established. Literature review requires high level skills in the Bloom's taxonomy. It is also a critical skill for postgraduate students who aspire to pursue a research higher degree.

Instructions

There are generally five steps involved in conducting a literature review, which are planning, searching, reading, analysing, and writing. The planning phase needs to determine the type of literature review (quantitative or qualitative), the review scope (research questions or research topics), and sources of literature (academic, grey, or multivocal). The search phase needs to determine a suitable search string and digital libraries or search engines to be used. The reading phase reviews the collected literature, summarises the sources, and selects the sources to be included in the review report. The analysing phase uses different techniques such as summarise, synthesise, critique, and compare to assess the selected literature. Finally, the writing phase is to report the findings by putting it all together.

The literature review should be approximately 4000 words and cover all the phases from planning all the way to writing. In particular:

- You need to detail your planning phase including identifying research question(s) or research topic(s) relevant to the project – peer review of assessment guides workflow management system (e.g., peer review practices in learning and teaching, workflow management systems, or technology stack for developing and deploying web applications) with justifications, type of review (quantitative or qualitative), and sources of literature (academic, grey, or multivocal).
- You need to detail your search phase, inclusion and exclusion criteria for selecting literature, and analysis techniques used to assess the selected literature.
- You need to properly organise your literature review report. It should not be a series of unconnected summaries of studies, but rather a synthesis of related literature. The report should start with an introduction section, proceed with the main body that uses subject-matter headings to logically group studies with a similar focus and direct readers' attention, and end with a summary or conclusion that pulls all the main points together. You can find guidelines on how to structure a literature review report in **Some Helpful Websites and Resources**.
- You need to use the [IEEE Citation Reference Style](#). Avoid using quotations and reproducing graphs or tables unless absolutely necessary. Make sure your similarity report is acceptable (< 20%) before submitting your report.

Structure

Refer to the rubric for details of mark distribution.

How do I submit?
